

To Our Customers & Friends,

This is a brief newsletter to acquaint you with one of the newest, yet oldest, nurseries in Michigan.

Our father, John Bakale Sr., started a small nursery in 1952. We worked at that nursery from the time we were small until he sold it in 1987. That nursery was Northland Evergreen Company, Inc. This was one of the oldest and largest nurseries in Michigan.

Because of our experience and love for the nursery business, we planted field nursery stock and started Michigan Evergreen Nursery. The upcoming year marks our 12th anniversary of selling and shipping our plant product.

We now grow Burning Bush, Arborvitae, Pine, Spruce, Cistena, Yews and Korean Lilac in our fields. We also have a container division consisting of Junipers, Deciduous Shrubs, Perennials and Trees. A new area of expansion is a pick-up yard located right by our office building.

We were brought up with the philosophy of quality and service to our customers. We are a new nursery with years of experience. We extend a warm invitation to visit our nursery and see the quality of our nursery stock and experience our service.

We love to grow plants - come watch us grow!

We are looking forward to your visit.

Thank you for your time and kind consideration.

**Sincerely,
From the three of us**

John, Tom & Ann Marie
